

Jason Phillips

412-301-3682 | jason@strongcode.net | Pittsburgh, PA

Summary

Experienced Full-Stack Developer with over two decades of expertise in creating robust web applications. Proficient in frontend technologies such as React, jQuery, Tailwind CSS, and Bootstrap, and backend specializations in Node.js/Express.js and PHP frameworks like Laravel. Adept at building secure APIs with REST and GraphQL, integrating AWS serverless technologies, and ensuring top-notch security with tools like OAuth and Cognito. Skilled in Docker for containerization, CMS platforms like WordPress and Joomla, and up-to-date with emerging AI technologies such as Anthropic and OpenAI. With a keen focus on security, scalability, and user experience, I deliver modern web applications tailored to meet user needs and industry standards.

Experience

Devgree.com

Software Developer/Engineer & Architect | 10/2023 - Present

Developed Devgree.com with a React.js and Redux front-end, featuring responsive design with Bootstrap and Tailwind CSS. User authentication is implemented using Passport.js, with secure password handling via bcryptjs and token management with jsonwebtoken. The Express.js back-end handles sessions, security, and environment configurations with express-session and cors. MongoDB data interactions are managed through Mongoose, and nodemailer is used for email functionalities. All code is maintained with Git and the app is containerized for deployment with Docker.

Upwork

Full Stack Developer / Software Engineer / DevOps | 03/2021 - Present

- Developed a large complex Linux Joomla PHP Framework, MySQL, jQuery & Bootstrap price survey application for Mobile and Desktop, leveraging advanced MySQL stored procedures, custom APIs, and plugins.
- Developed a money management tool using Laravel PHP and MongoDB in a serverless setup on AWS Lambda, with a GraphQL API for a React frontend, AWS Cognito OAuth login, and Tailwind CSS.
- Created a Laravel addon for Twilio SMS-to-email integration.

Strongcode Inc.

Full Stack Developer & Team Manager | 06/2003 - 03/2021

- Managed a team of programmers, developers, and designers.
- Led the development of custom websites and applications using Laravel and MySQL, alongside specialization in Joomla and WordPress site development.
- Delivered PHP/jQuery/MySQL programming, Stripe API integrations, Docker, WHM, bug fixes, web application maintenance, Laravel, MySQL, React, and SEO initiatives.
- Performed DevOps on Google Cloud Platform and Digital Ocean.

CartStore

E-commerce Web Developer / Junior PHP Developer. | 01/2003 - 01/2012

- Developed an open-source PHP, MySQL SaaS e-commerce platform.
- Developed ecommerce front-ends
- Competed with leading platforms, offering features surpassing most contemporary shopping carts.
- Gained a significant user base with listings on sites like download.com.
